

Porsche 996 Carrera oil light comes on when the engine is warm

Beitrag von „Albert Motorsport“ vom 9. Mai 2026, 09:56

Hi Bxxxxx,

Thank you for your kind words, that really means a lot to me. I actually think that is a very nice idea. If PUUR would be interested in it, I would certainly be open to doing an interview. After all these years working with Porsche, there are definitely quite a few stories, experiences, and technical insights worth sharing.

What I enjoy most is still the combination of craftsmanship, engineering, and passion that surrounds these cars and the people who love them. If that could make for an interesting article for fellow enthusiasts, then I would be happy to contribute.

So yes, feel free to explore the idea with the magazine. And thank you for even thinking of me for something like this, I truly appreciate it. Have a great weekend as well!

Best regards,
Jürgen Albert
