What is an ABS - ESP - TC system and how does it work?

Beitrag von „e90m36mt“ vom 17. Februar 2024, 05:00

Hello Jürgen,

in a previous post you talk about updates to the abs system

''Another option will be available shortly, a tracking system that will then regulate the slip when accelerating in curves as well. Another advance in terms of safety and speed. I will report on this separately.''

Did you guys end up perfecting it?
