

2023 model year software status for all Taycan variants

Beitrag von „Albert Motorsport“ vom 20. Juli 2022, 00:01

[Zitat von Porsche News International](#)

Worldwide, more than 75,000 examples of the Taycan have been delivered since Porsche introduced its first all-electric sports car at the end of 2019. Now, a comprehensive update is on the horizon: regardless of vehicle age, engine, and body, all model variants can be brought up to the status of the 2023 model year with a software update. The update will be implemented on a market-specific basis.
