1982 Porsche 930 Turbo with a sequential gearbox or dog-engagement gearbox

Beitrag von „Albert Motorsport“ vom 12. November 2026, 20:34

Dear Sir or Madam,

I compete in motorsport events with a 1982 Porsche 930 Turbo.
I am looking for a specialist who can build or supply a suitable sequential gearbox or dog-engagement gearbox for this car.

Could you please let me know whether you can assist and what options you offer?

Thank you in advance for your response. E.

Dear Sir or Madam,

Thank you for your enquiry and your interest in our services.

We can certainly assist you with your 1982 Porsche 930 Turbo

and the installation of a 6-speed sequential gearbox.

However, please note that several modifications to the vehicle

will be necessary to accommodate the gearbox and ensure the r

equired strength and reliability:

- The rear axle carrier will need to be cut, reinforced and modified.
- We will install new rear spring-over-coil suspension units.
- The front shock absorbers will also need to be replaced.
- The rear transmission tunnel inside the passenger compartment will need to be raised and enlarged to provide sufficient clearance for the sequential gearbox.

Once these modifications have been completed, we can install a 6-speed

sequential gearbox in your Porsche 930 Turbo.

We would be pleased to discuss the project with you in more detail and provide further information regarding the technical specifications and the next steps.
